

FOR IMMEDIATE RELEASE

**ILD ANNOUNCES THE ACQUISITION OF ANDIAMO TELECOM'S
INTERNATIONAL OPERATOR SERVICES DIVISION**

PONTE VEDRA BEACH, FL August 6, 2007 – ILD Telecommunications, Inc. today announced the acquisition of Andiamo Telecom's Division of International Operator Services. This acquisition broadens ILD's outsourced services reach into the international marketplace. The integration of Andiamo Telecom's operator services assets with ILD's substantial customer base, further solidifies its market penetration in the US and expansion overseas.

ILD has demonstrated steady growth in international market share in recent years. This acquisition places ILD in a stronger position to compete overseas and address the needs of international carrier, hotel, and payphone community.

Privately held and based in San Luis Obispo, California, Andiamo Telecom's operator services call center division will be integrated with ILD's existing Outsourced Services division, which serves communications carriers, hospitality providers, and telecommunications aggregators. ILD will retain Andiamo Telecom's experienced sales management personnel, in order to ensure a seamless transition.

"We are very excited to announce another important step in the strategic expansion of our company," Mike Lewis, ILD's Chairman & CEO commented. "We are also very pleased to welcome Andiamo Telecom's customers and independent sales agents all over the world to the ILD team", said Mr. Lewis. "Existing Andiamo

Telecom customers stand to benefit greatly from the technical advantages of ILD's state of the art platforms and infrastructure."

Dennis Stoutenburgh, ILD's President & COO stated, "Andiamo Telecom's international partnerships will be a terrific complement to our Operator Services business. We are confident that this integration coupled with ILD's financial strength, broad customer base and commitment to the operator services industry, will position us to enhance our core business. We will continue to evaluate opportunities that further leverage our resources and competitive strengths, to maintain a dominant position in the operator services industry."

"Andiamo Telecom has made a strategic decision to focus efforts on the specialty long distance market, so there's no doubt that this is a good move for both companies", says Mickey Rao, President and CEO of Andiamo Telecom. "We've made significant in-roads to the carrier/PTT marketplace for operator services and ILD is the perfect company to continue those alliances and marketing partnerships that Andiamo Telecom has formed over the past three years. It is clear that ILD's management team and its personnel demonstrate the depth and background for solid, long-term growth," said Rao.

"We are delighted to combine our organization with ILD," said Russ Lovell former Vice President and General Manager of Sales Operations for Andiamo Telecom, who will head the expansion of ILD's outsourced product suite overseas. "Andiamo Telecom's customers will enjoy all of the benefits of scale that ILD offers with its newly released IP platforms."

The combination of ILD's solid domestic infrastructure with Andiamo Telecom's overseas partnerships is expected to firmly establish a productive international sales channel and increase its international presence in the next fiscal year.
