**ILD ANNOUNCES THE DEPLOYMENT OF COLLECT CALLS TO CELLULAR TELEPHONES ON THE INTELIS ENHANCED OPERATOR SERVICES (EOS) PLATFORM**

**PONTE VEDRA BEACH, Florida and ALPHARETTA, Georgia** – ILD Telecommunications Inc., a premier enhanced communication provider, today announced the deployment of Collect to Cell<sup>SM</sup>. This service allows for collect payment method telephone calls to be placed and billed to cellular telephone subscribers. Collect to Cell<sup>SM</sup> was launched on the Intelis Enhanced Operator Services (EOS) system after Intelis modified the system to support additional call processing capabilities required for this new market.

“The Intelis platform’s flexibility allowed us to quickly support new customer requirements in a rapidly converging telecommunication arena.” said Greg Hall, Vice President Network Engineering and Operations, ILD. “Intelis’ experience and expertise in operator services billing, call rating, validation, call branding, and fraud control allowed them to fully understand our unique requirements and rapidly deploy this innovative Collect to Cellular product.” concluded Mr. Hall.

ILD’s Vice President of Sales, Dave Hanron added, “This is another example of ILD’s ongoing commitment to introduce innovative payment options. We’re servicing end-users by completing and billing collect calls to cell phones, while increasing call completion rates for our operator services partners.”

“We are thrilled and privileged to announce ILD is again utilizing the EOS platform’s flexibility to be on the cutting edge of providing enhanced operator services.” stated Wayne Wise, Director of Product Management, Intelis. He added, “The ability for a platform to support landline and wireless convergence is a key requirement for the future of telecommunications. Once again ILD is showing they are an innovative industry leader in the world of enhanced operator services. This innovation and others like it has been a key part of their continued success serving their customers.”
